Erynn's Story: An Endometriosis Art Journey

Title: Leaf Lady

After 8 weeks of art making, “Erynn”, an endometriosis sufferer, says:

“Art making for endometriosis helped me Observe and connect with my changing body. Throughout the 8 weeks I was able to visually move from Inner gross sensations to gradually letting go and understanding endometriosis as it arose. This moving outwards caused a connection with nature and a healing journey continues. A truly wonderful, supportive and exciting process that I enjoyed sharing.”
